Certificate for Water testing **Laboratory Hado Life Europe of Dr. Masaru Emoto**

Sample Received: ‚Fromin Water‘

Testing method: Water-Ice-Crystal testing according to Dr. Masaru Emoto

Testing procedure: Every sample is dropped on 50 Petri-dishes and for 24 hours by – 28°C frozen. Thereafter the samples are examined by -5°C with a bright field microscope, magnification 1:200 and photographed.

Fromin Water

The degree of alignment, which is shown through recognizable harmonic structures in frozen state is, based on the insights of Dr. Masaru Emoto, a further important characteristic describing the quality of water. It is assumed that the degree of alignment has a considerable influence on its surrounding and is thus playing an important role for the state of health for all living forms.

Head of Laboratory
Dipl.-Ing. MSc Rasmus Gaupp-Berghausen
